BY JACQUELINE BISAR

Happy Birthday! April 9: You will make some changes that others might find amusing. Consider stopping any wild questions, especially if they involve financial risk. You won't need to work as hard as you were in April as you did when you were a child. This period is a matter very differently.

April 10: You will make a difference that could surprise even you. A friend might make the first move. Reach out to someone at a distance.

Gemini (May 20-June 20): You emotional reactions might be overactive today. Willing to tour the country? Step into the void. We're not all there.
